Kyuwon Park

☎ +82 10-8934-9959 | ✉ kw040131@dgist.ac.kr | kw040131@gmail.com | Seoul, South Korea

EDUCATION

DGIST (Daegu Gyeongbuk Institute of Science and Technology) Feb. 2023 – Present
B.S. in Computer Engineering & Life Sciences (Double Major)

University of California, Berkeley Jun. 2023 – Aug. 2023
Summer Student Berkeley, CA, USA

Korea University Mar. 2026 – Jun. 2026
Exchange Student Seoul, South Korea

RESEARCH EXPERIENCE

Harvard Medical School, Massachusetts General Hospital, Woo Lab Jun. 2025 – Sep. 2025
Research Intern (Advisor: Prof. Jonghye Woo) Boston, MA, USA

- Studied diffusion-based tumor synthesis and curated paired multi-contrast MRI datasets for segmentation research

Remote Researcher Sep. 2025 – Mar. 2026

- Built AI pipelines for chest X-ray reading support, tumor-synthesis diffusion models, and an MRI–PET fusion network for Alzheimer's diagnosis
- Result: First-author paper accepted to MICCAI-affiliated workshop

DGIST (MBIS Lab) Oct. 2024 – Mar. 2026
Undergraduate Researcher (Advisor: Prof. Jaeyoun Hwang) Daegu, South Korea

- Compared and optimized classification models (ResNet, DenseNet, EfficientNet) on Alzheimer's MRI data, using Layer-CAM to validate model reasoning
- Presented at the 2025 K-Bio Star / Glocal Lab student conference

DGIST (SEO Lab) Jun. 2024 – Aug. 2024
Summer Research Intern (Advisor: Prof. Jin Soo Seo) Daegu, South Korea

- Researched Alzheimer's pathology (β-amyloid accumulation, dopamine receptor dysfunction) using 3D assembloid and organoid models

PUBLICATIONS

Patient-Adaptive Modality Attention for Multimodal Brain Tumor Synthesis via Latent Diffusion 2026
K. Park et al. — MICCAI Workshop (DGM4MICCAI) — Accepted; oral presentation, Strasbourg, France (Oct. 1)

OTHER RESEARCH PROJECTS

Redundancy-Aware Cross-Modal Attention for Multimodal Alzheimer's Diagnosis
Bidirectional cross-attention network fusing MRI and PET for Alzheimer's diagnosis

PPG–Ultrasound Fusion Blood-Pressure Monitoring Patch (UGRP) Mar. 2025 – Dec. 2025
Designed and validated a wearable blood-pressure patch; presented poster at WEEF & GEDC 2025

AWARDS & HONORS

Gold Award, GCSC (Global College Startup Camp) Jan. – Feb. 2026
Local Track 1st place, international startup competition; Gachon University × Hitotsubishi University

STARTUP PROJECTS

Gachi — AI life-documentation platform Jan. 2026 – Present
AI Planning & Development; grew out of the GCSC gold-award project (GCSC seeding/funding program)

Jetmind — closed-loop AI for circadian rhythm recovery Jul. 2026 – Present
AI Development Lead; affiliated with the S&T Institutes' Startup League (DGIST, GIST, KAIST, UNIST), funded

OTHER ACTIVITIES

Ministry of SMEs and Startups — K-Global Correspondent Mar. 2025 – Dec. 2025
Produced 25+ policy communication pieces across topics from SME support to G7/APEC

DGIST Official SNS Supporters, "Dignal" Mar. 2025 – Dec. 2025
Grew official Instagram/YouTube short-form content to 50,000+ combined reach

4th Industrial Revolution Youth Experience Corps Oct. 2025 – Jan. 2026
Toured CES 2026 and Silicon Valley companies; submitted a global startup ecosystem report

Samsung Electronics Open Tech Companions Aug. 2026 – Dec. 2026
Team lead, open-source team

Kiwoom Securities Supporters Apr. 2026 – Sep. 2026
Submitted an app and community improvement proposal

SKILLS

Technical: Python, PyTorch, PyTorch Lightning, MONAI, CUDA, 3D CNN, U-Net, VQ-GAN, Latent Diffusion Models, Medical Image Processing, MRI/NIfTI Analysis, Explainable AI (Grad-CAM, Layer-CAM), C, C++

Research: Multimodal Data, Medical Imaging AI, Explainable Deep Learning, Alzheimer's Disease Neuroimaging Analysis

Languages: Korean (Native); English — TOEIC 900 (2024), OPIc IH (2026)
